ELSEVIER International Journal of Mass Spectrometry and Ion Processes 156 (1996) 213–215

International Journal of Mass Spectrometry and Ion Processes

Subject Index

Absorption curve
A simulation study of ion kinetic energies during resonant excitation in a stretched ion trap 11
Alkylation
Alkylation of C_{60}. Reaction between C_{60} anions and *tert*-butyl chloride and mass spectrometry analysis 85
Allyl radicals and ions
Thermochemistry of the benzyl and allyl radicals and ions 109
Amines
Measurements of the kinetic energy released in decompositions of proton-bound dimers of primary amines 203
Benzyl radicals and ions
Thermochemistry of the benzyl and allyl radicals and ions 109
Cesium bombardment
Investigations on the MCs_2^+ formation in secondary ion mass spectrometry 1
Chlorinated fullerenes
Hydrogenated and chlorinated fullerenes detected by "cooled" modified matrix-assisted laser desorption and ionisation mass spectroscopy (MALDI-MS) 103
Cluster formation
Formation of iron oxides clusters induced by resonant laser ablation/ionization 173
Collisional activation
Collision-induced electronic excitation of CH^+ ions by impact on rare gas atoms and some diatomic molecules 41
Correlated oscillation
Correlated oscillations and their r.f. spectra detectabilities of two oppositely charged thermal ion clouds in a Paul trap 77
Cross-section
Collision-induced electronic excitation of CH^+ ions by impact on rare gas atoms and some diatomic molecules 41
Cs^+ attachment
Monte Carlo simulation of the formation of MCs^+ molecular ions 61
C_{60}
Alkylation of C_{60}. Reaction between C_{60} anions and *tert*-butyl chloride and mass spectrometry analysis 85
Effusion molecular beam
Stability of the ion current in an ion source with non-homogeneous focused photon and effusion molecular beams 141
Electron emission
Electron emission controller with pulsed heating of filament 31
Energy distributions
Investigations on the MCs_2^+ formation in secondary ion mass spectrometry 1
Energy spectra
Monte Carlo simulation of the formation of MCs^+ molecular ions 61
Excited states
Collision-induced electronic excitation of CH^+ ions by impact on rare gas atoms and some diatomic molecules 41
Flowing afterglow/selected ion flow tube
Thermochemistry of the benzyl and allyl radicals and ions 109
Focused photon beam
Stability of the ion current in an ion source with non-homogeneous focused photon and effusion molecular beams 141
FT ion cyclotron MS
Formation of iron oxides clusters induced by resonant laser ablation/ionization 173
Hydrogenated fullerenes
Hydrogenated and chlorinated fullerenes detected by "cooled" modified matrix-assisted laser desorption and ionisation mass spectroscopy (MALDI-MS) 103
Ion source
Electron emission controller with pulsed heating of filament 31
Stability of the ion current in an ion source with non-homogeneous focused photon and effusion molecular beams 141

Ion trajectory simulation
A simulation study of ion kinetic energies during resonant excitation in a stretched ion trap 11
Ion-dipole/induced dipole interaction
The reactions of the highly polar ion ArD_3^+ with C_3H_8 and C_4H_{10} 189
Ionization gauge
Electron emission controller with pulsed heating of filament 31
Iron clusters
Formation of iron oxides clusters induced by resonant laser ablation/ionization 173
Iron valency
Formation of iron oxides clusters induced by resonant laser ablation/ionization 173
Isotope dilution
Certification of a ^{15}N-enriched nitrate species-specific spike isotopic reference material IRMM-627 67
Kinetic energy release
Measurements of the kinetic energy released in decompositions of proton-bound dimers of primary amines 203
Laser ablation/ionization
Formation of iron oxides clusters induced by resonant laser ablation/ionization 173
Laser desorption
Observation of noncovalent complexes using laser-induced liquid beam ionization/desorption 195
Laser desorption/ionization
Some characteristics of matrix-assisted UV laser desorption/ionization mass spectrometric analysis of large proteins 151
Liquid beam
Observation of noncovalent complexes using laser-induced liquid beam ionization/desorption 195
MALDI
Hydrogenated and chlorinated fullerenes detected by "cooled" modified matrix-assisted laser desorption and ionisation mass spectroscopy (MALDI-MS) 103
Some characteristics of matrix-assisted UV laser desorption/ionization mass spectrometric analysis of large proteins 151
Mass spectrometry
Certification of a ^{15}N-enriched nitrate species-specific spike isotopic reference material IRMM-627 67
Electron emission controller with pulsed heating of filament 31
MCs^+ cluster
Monte Carlo simulation of the formation of MCs^+ molecular ions 61
Metal cesium ion formation
Investigations on the MCs_2^+ formation in secondary ion mass spectrometry 1
Molecular beams
A photoionization study of vibrational cooling in molecular beams 133
Molecule formation
Investigations on the MCs_2^+ formation in secondary ion mass spectrometry 1
Negative thermal ionisation
Certification of a ^{15}N-enriched nitrate species-specific spike isotopic reference material IRMM-627 67
Nitrate
Certification of a ^{15}N-enriched nitrate species-specific spike isotopic reference material IRMM-627 67
Noncovalent associations
Observation of noncovalent complexes using laser-induced liquid beam ionization/desorption 195
Paul trap
Correlated oscillations and their r.f. spectra detectabilities of two oppositely charged thermal ion clouds in a Paul trap 77
Photoionization
A photoionization study of vibrational cooling in molecular beams 133
Polar ions
The reactions of the highly polar ion ArD_3^+ with C_3H_8 and C_4H_{10} 189
Proteins
Some characteristics of matrix-assisted UV laser desorption/ionization mass spectrometric analysis of large proteins 151
Proton affinities
Measurements of the kinetic energy released in decompositions of proton-bound dimers of primary amines 203
Proton-bound dimers
Measurements of the kinetic energy released in decompositions of proton-bound dimers of primary amines 203
Rates of reaction
Thermochemistry of the benzyl and allyl radicals and ions 109
Reactions of ArD_3^+
The reactions of the highly polar ion ArD_3^+ with C_3H_8 and C_4H_{10} 189

Recombination
Monte Carlo simulation of the formation of MCs^+ molecular ions 61
Resonance absorption
Correlated oscillations and their r.f. spectra detectabilities of two oppositely charged thermal ion clouds in a Paul trap 77
Resonant excitation
A simulation study of ion kinetic energies during resonant excitation in a stretched ion trap 11
Secondary ion mass spectrometry
Investigations on the MCs_2^+ formation in secondary ion mass spectrometry 1
SIMS
Monte Carlo simulation of the formation of MCs^+ molecular ions 61
Simulation
A simulation study of ion kinetic energies during resonant excitation in a stretched ion trap 11
Spatial and time correlated emission
Investigations on the MCs_2^+ formation in secondary ion mass spectrometry 1
Spike isotopic reference material
Certification of a ^{15}N-enriched nitrate species-specific spike isotopic reference material IRMM-627 67
Stabilization
Electron emission controller with pulsed heating of filament 31
Stretched quadrupole ion trap
A simulation study of ion kinetic energies during resonant excitation in a stretched ion trap 11
Target gas effects
Collision-induced electronic excitation of CH^+ ions by impact on rare gas atoms and some diatomic molecules 41
Thermochemistry
Thermochemistry of the benzyl and allyl radicals and ions 109
Time-of-flight-laser-microprobe mass spectrometry
Formation of iron oxides clusters induced by resonant laser ablation/ionization 173
Vibrational cooling
A photoionization study of vibrational cooling in molecular beams 133
